

Bamboo Scrub

Bambusa Arundinacea

INCI: Bambusa Arundinacea Stem Extract

CAS: 91771-32-3

EINECS: 294-922- 2

Origin: Asia, mostly South India and bengal.

Our BAMBOO SCRUB is a solidified organic silica extracted from the nodes of the female bamboo. Its indian name is Tabasheer, and it contains more than 75% silica, as well as iron, calcium, choline and betaine. It is traditionnally used in Indian Phytotherapy for its remineralizing properties and for strenghtening hair and nails. Because of its white colors and its stability, even in water, our bamboo scrub is ideal for cosmetic formulation Our Bamboo Scrub is a **100% vegetable exfoliator**, offering a safe and natural exfoliation for the skin, even for sensitive skins.

According to the size particles, the exfoliation process is more or less powerful, allowing the scrub to be used in a **wide range of formulations**.
